2016

From new battery-operated sets to the latest E-Z App™ touch-screen wireless train control through your Apple smart device, Bachmann offers the perfect train to fit your interests and budget. This year we are pleased to introduce a new E-Z App™-equipped train set, the Blue Star, and additional E-Z App™-equipped locomotives: the RS-3 and GP-35.

Thomas & Friends™ fans will want to meet the newest HO engine: Rosie (with moving eyes). There are also lots of new Thomas & Friends™ HO rolling stock options to choose from. The Narrow Gauge Thomas & Friends™ product line is growing with Rheneas and three Slate Wagons. Sure to delight Thomas & Friends™ Large Scale modelers are Thomas the Tank Engine™ and Percy with DCC Sound.

New HO engines include the Baldwin 52” Driver 4-6-0 American Steam Locomotive and EMD E7-A Diesel in Sound Value and DCC-ready versions and the Sound Value EMD GP38-2 Diesel Locomotive. Rolling stock additions include 72’ Heavyweight Passenger Cars (with interior lighting), 40’ Steam Era Box Cars, Old-Time Box Cars, and Old-Time Tank Cars.

Our N scale line of Sound Value-equipped locomotives continues to expand with the PRR K4s 4-6-2 Steam Locomotive. The GG-1 Electric is offered in both Sound Value and DCC-Ready models; it looks great with the new 72’ Heavyweight Observation Cars (with Lighted Interior). We are also introducing 85’ Streamline Fluted 2-Door Baggage Cars plus Observation and Coach Cars (both with interior lighting). Also new in N scale are ACF 56’ 4-Bay Center-Flow Hoppers.

The On30 2-6-0 Steam Locomotive with Metal Gears is a sound-ready DCC-equipped locomotive. You can easily add 16-bit Tsunami® SoundTrax® sound to this engine with the purchase of the companion Plug-and-Play 2-6-0 Sound Module.

Please note that for your convenience, we have incorporated our acclaimed Spectrum® products into their corresponding scale sections. As you explore the catalog, make sure to look for brand-new scenery and accessory items as well as the Online Video logo that indicates you can watch that product in action on Bachmann’s YouTube channel. Now that’s the way to run a railroad®

**The General**

*an E-Z Track® set with E-Z Mate® couplers*

Item No. 00736 • Suggested price: $295.00

The Civil War's famous Great Locomotive Chase, commemorated in a movie of the same name, comes to life with The General train set! On April 12, 1862, James J. Andrew and a group of Union raiders commandeered the South's American 4-4-0, named The General, from the Western and Atlantic Railroad. Their daring plan was to sabotage rebel railroad lines deep behind enemy lines. An alert W&ARR conductor, William Fuller, noticed the locomotive moving and with two fellow employees was soon in hot pursuit through the mountains of Northern Georgia. They followed The General on foot until they were able to commandeer another locomotive, "The Texas," to continue the chase. After many stops to uproot track and cut telegraph lines, The General ran out of wood fuel and water and was abandoned. Andrew's Raiders were later captured outside Chattanooga. Some were able to escape from jail, but eight were hung as spies. The youngest of the Raiders, 19-year-old Jacob Parrott, was the first soldier awarded the Medal of Honor by Secretary of War Stanton. The General train set lets you experience all the excitement of this historic adventure and comes complete with:

Baldwin Modern 4-4-0
(DCC Equipped)
Performs best on 15” radius curves or greater.

Suggested price: $359.00 each

Because it was the most widely employed wheel arrangement in this country from the 1880s through the end of the steam era, the 4-4-0 became known as the “American.” The original ornate locomotives gave way to Americans with cleaner lines, such as these Baldwin “modern” models. Bachmann has taken the modern 4-4-0 to the next level with features such as an NMRA-compliant 8-pin DCC decoder.

Features include:
- DCC-equipped for speed, direction, and lighting
- Dual-mode NMRA-compliant decoder with 8-pin plug
- Cog V-belt drive
- Die-cast boiler, chassis, and frame
- Operating headlight
- Finescale metal detail parts including separately applied bell, whistle, domes, and piping
- Detailed backhead
- Painted engineer and fireman figures
- RP25 wheel contours
- E-Z Mate® Mark II couplers on front and rear

380-TON SCHNABEL TRANSFORMER CAR
(North American style)
Performs best on 22” radius curves or greater.

Suggested price: $329.00 each

The Schnabel car's unique design allows it to carry extremely heavy or oversized loads, such as generators and transformers for power stations, by making the load an element of the car. The two tapered lifting arms that hold the load resemble a bird’s beak, which gave the car its name—Schnabel is from the German for "carrying-beak-wagon" (Tragschnabelwagen). Schnabel is a funny name for a seriously powerful freight car.

Features include:
- 16 sets of 125-ton roller-bearing trucks
- Prototypically correct 36” metal wheels
- RP25 wheel contours
- 8 span bolsters
- Detailed transformer load
- Molded hydraulic lines and pumps
- 27.5” long

E-Z Mate® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; E-Z Mate® Mark II couplers include an integrated metal coil spring. E-Z Mate® and E-Z Mate® Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install E-Z Mate® and E-Z Mate® Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well. E-Z Mate® and E-Z Mate® Mark II couplers operate with a standard metal “glad hand” and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet’s position.) Coupling, uncoupling, and other yard operations are all performed with ease.

Our On30 locomotives are based on stock models from Baldwin’s narrow gauge catalog.
